	No mold	No mold	No mold

■ Effects on raspberries (stored in the fridge)

Test	Start	4 days later	5 days later	8 days later
Untreated <11 raspberries>				
	No mold	1 black mold	2 black molds	3 black molds
<i>BerryVery</i> 30 sec. soaking (undiluted) <11 raspberries>				
	No mold	No mold	No mold	No mold

■ How to use

Example 1 (spray)

- Spray *Berry Very* (undiluted) evenly over the surface of the strawberries.
- *When spraying on raspberries, make sure that *Berry Very* is firmly applied to the hollows of the raspberries.

Example 2 (soak)

- When treating strawberries, soak them in the undiluted *Berry Very* for about 30 sec. to 1 min. For repeated usage, use it 3 to 4 times as a guideline.
- When treating raspberries or blackberries, soak them in the undiluted *Berry Very* for about 30 sec. For repeated usage, use it 5 to 6 times as a guideline.

- If you do not use *Berry Very* immediately after preparation, please store it at low temperature such as in a fridge.
- Store in cool and dark place.
- Alcohol smell may remain right after spraying.

Usage guideline for soaking use
Berries : Undiluted *Berry Very* = 1 : 2
(Extent which fruits are soaked)

■ Feedbacks from customers

We use *Berry Very* on strawberries, as they can be easily damaged depending on the quality and season. There is no change in appearance, and the wastage rate has been improved, which is very useful.

We use *Berry Very* on lots of strawberries we purchased before Christmas, and they were in good condition until the beginning of the year. We are surprised that *Berry Very* can maintain such a good condition even though there are no harmful ingredients.
